## Historical Context Leading to American Government

## Colonial Foundations and Early Governance

Before the United States declared independence, the thirteen American colonies operated under a variety of governance structures imposed by European powers, primarily Britain. These colonies developed their own local governments, which laid the groundwork for American political thought. - Charter Colonies: Virginia and Massachusetts were charter colonies, granted charters by the Crown that allowed them to govern themselves with a degree of autonomy. - Proprietary Colonies: Maryland and Pennsylvania were proprietary colonies, governed by individuals or groups granted land and authority by the Crown. - Royal Colonies: Most colonies, such as New York and South Carolina, were royal colonies directly controlled by the British Crown through appointed governors. Despite their differences, these colonies shared common features: - Assemblies or legislatures that represented colonists' interests. - Local courts and councils. - A degree of self-governance, which fostered ideas of representation and rights.

## Growing Tensions with Britain

By the mid-18th century, tensions escalated between Britain and its colonies due to issues such as taxation without representation, trade restrictions, and British military

presence. Key events include: - The Stamp Act (1765): Imposed taxes on printed materials, sparking protests. - The Boston Tea Party (1773): Protest against tea taxes, leading to punitive measures. - The Intolerable Acts (1774): Punitive laws that further alienated colonists. These conflicts culminated in the colonies seeking greater autonomy and ultimately, independence.

# The American Revolution and the Birth of Governance

## Declaration of Independence

On July 4, 1776, the colonies declared independence from Britain through the Declaration of Independence, drafted primarily by Thomas Jefferson. This document articulated the fundamental principles that would guide the new nation: - Natural Rights: Life, liberty, and the pursuit of happiness. - Consent of the Governed: Governments derive their legitimacy from the consent of the governed. - Right to Revolution: The people have the right to overthrow unjust governments. While the Declaration was revolutionary in rhetoric, it did not establish a government but set ideological foundations for future governance.

## Articles of Confederation

Following independence, the colonies operated under the Articles of Confederation (ratified in 1781), which served as the first national constitution. Key features included: - A weak central government with limited powers. - A unicameral legislature (Congress) with one vote per state. - No executive branch or national judiciary. - Significant power retained by individual states. Problems with the Articles included: - Lack of authority to tax or regulate commerce. - Difficulty passing legislation. - No power to enforce laws or resolve disputes between states. These weaknesses highlighted the need for a stronger federal government, prompting the Constitutional Convention.

# Constitutional Foundations of American Government

## The Constitutional Convention (1787)

In response to the failures of the Articles, delegates met in Philadelphia to draft a new Constitution. Notable figures involved included George Washington, James Madison, Benjamin Franklin, and Alexander Hamilton. Major compromises during the convention: - The Virginia Plan: Proposed a bicameral legislature based on population. - The New Jersey Plan: Advocated for equal representation for

states. - The Great Compromise (Connecticut Compromise): Established a bicameral legislature with: - The House of Representatives (based on population). - The Senate (equal representation, two per state). Other key compromises: - The Three-Fifths Compromise: Counts enslaved people as three-fifths of a person for representation and taxation. - The Commerce and Slave Trade Compromise: Allowed Congress to regulate commerce but prohibited bans on slave trade before 1808.

### Ratification and the Federalists vs. Anti-Federalists

The proposed Constitution required ratification by nine states. Debates emerged between: - Federalists: Supported a strong central government, favoring the Constitution. - Anti-Federalists: Concerned about potential tyranny and the lack of a Bill of Rights. To secure ratification, the Federalists promised to add a Bill of Rights, which became the first ten amendments ratified in 1791.

## Philosophical Influences on American Government
